Srinivasa Reddy Sanikommu

Profile

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with a strong interest in backend development and AI-powered applications. Skilled in Node.js, Express.js, MongoDB, JavaScript, Python, and REST API development. Passionate about problem solving, learning new technologies, and building efficient real-world software solutions.

Education

RVR & JC College of Engineering, Guntur 2023 – 2027 (Expected)
B.Tech in Computer Science and Engineering (AI & ML) — *CGPA: 8.34*

Sri Chaitanya Jr College, Narasaraopet 2021 – 2023
Intermediate MPC — *95%*

Skills

Programming Languages: Python, JavaScript
ML Libraries:(Beginner) Scikit-learn, Numpy, Pandas
Frontend: HTML5, CSS3, ReactJS (Basic)
Backend & APIs: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL

Internship

Backend Developer Intern (NodeJS) — KriBud Web Tech Oct – Dec 2025

- Developed and maintained scalable backend services using Node.js, Express.js, and MongoDB for web applications.
- Designed and implemented RESTful APIs for authentication, order management, and database operations.
- Optimized MongoDB queries and backend workflows, improving system efficiency by **35%** .
- Collaborated with the development team to debug issues, test new features, and deploy reliable backend solutions.

Projects

InsurePred – ML-Based Health Insurance Premium Prediction
Tech Stack: MERN Stack, Flask API, Machine Learning Microservice Live

- Developed a full-stack AI-powered application for predicting health insurance premiums in real time.
- Built a Flask-based ML microservice integrated with the MERN application for prediction processing.
- Designed REST APIs and optimized frontend-backend communication for low-latency responses.
- Implemented scalable backend architecture and database management for efficient data handling.

OrderNow – Food Delivery & Grocery Platform
Tech Stack: MERN Stack, Stripe Connect Payment Gateway GitHub

- Developed a full-stack food and grocery ordering platform with responsive user experience.
- Integrated Stripe payment gateway for secure online transactions and payment processing.
- Optimized backend data flow and MongoDB operations for better application performance.
- Implemented scalable backend logic to support concurrent users and real-time order handling.

Certifications

- NodeJs Complete Course — GeeksforGeeks
- Full-Stack Web Development — Udemy

Interests

Backend Development, AI tools, Problem Solving, Video editing(Beginner)
